

What to ask during interview

- What kind of technologies will I work with
- What kind of Training Will a I receive
- Who I would work with on a daily basis and what would my schedule be like.
- Any advice you would give to a new hire
 - o Curious Problem Solver
- What would make you want to give a return offer to an intern.
 - o State their opinion and contribute to the conversation
 - o Be flexible and involve yourself
- Is there anything I said that you might have concerns about?

Molly and Jacob

Scenarios

- Tell me about yourself
- Is there anything you would like to know specifically about?
- - o Hello My name is Rithvik Allamaneni
 - o I am a sophomore at the Ohio State University, majoring in Computer Science Engineering, and minoring in Biomedical Engineering.
 - o I am in the Squash Club team at OSU as well as the Collaborative Software Development Club and the Telemetry Team for the Formula Buckeye team at OSU.

- I am a very curious person by nature, and I love to build and learn how technical systems work.
 - I have a lot of experiences working with others on projects, but, I want to continue on to something more complex and actually used in the industry. I am also minoring in biomedical engineering, because I am I want to have some context in the medical world since I am interested in specifically how data systems and different technologies are used in medical research.
 - And I know a helpful part of software development and data science is having that context and background in the field so you can better understand the data.
-
- Why Do you want to work at Medpace
 - So my father is a surgical oncologist, and
-
- -
 - For me, I want to understand what I want to do moving forward, so first experiencing a real-world internship will help me understand what career I want to pursue, and also, with how fast tech is moving, I want to learn some of the current softwares and how they used by companies.
 -
 - Recently I had some experience with testing through one of my courses at OSU and became interested in it so I applied to this intern position to explore it more and its real world application.
 -
- My father works as a physician, so I wanted to work in something related to the medical industry, however I also loved
-
- Tell me about a time you had to choose between 2 options
 - Hello My name is Rithvik Allamaneni

\

ETL Pipeline

- Extract
 - Data is extracted from different sources, homogeneous/heterogeneous input sources
- Transform
 - Transforms the data based on the use case
 - Some common ones are input validation, cleaning, normalizing, or preparing the data
- Load
 - Moving data into desired database

Docker

- A software used to deploy a system and run application in a consistent system.
- Different from Virtual Machines since it is much more lightweight, on-demand usage, and shares the same OS as the deployed device
